Relaterade fynd/related finds

Belt consists of 5 parallel lines of sewn holes either side of 4 fibre rope cores running the full length of the belt. The rope is made of 3 individual ropes wrapped in an S-twisted pattern.

The total length of the belt if rejoined as is would be approximately 90-95cm, possibly set to the girth of belt's owner. The two clips could possibly be for carrying a frog or other attachment for a sword. Associated with barrel 8680.
