Material

Träslag/wood type: OAK ✓

Fiberriktning/grain: straight

Conversion: 

Dimensioner (millimeters)

Längd/length	Bredd/width	Tjocklek/thickness	Diameter (Axle)
2380 ✓	715 ✓	blade 45 / cap 87 ✓	

Joinery Made of 3 pieces - 2x long pieces in blade, 1x head cap. Simple faired surfaces. Mortise in lower edge of head + outer face of blade to form lifting handhold. ~~Too~~ mortise/rebate/dado for crescent reinforcing iron at lower end of blade. 2x scallops in outboard face edges near cap. 2x holes through head for rope ✓

Fastenings 3 edge dowels in blade, cap fastened to blade with 14 nails + 7 tree-nails. Blade reinforcing iron nailed down. Upper end of narrower blade piece nailed (1 toenail) to larger blade piece. ✓

Coatings

Skador/damage General surface erosion, worst at bottom end where edges almost completely gone. Large crack in narrow blade part, substantial shrinkage, some distortion. ✓

Reparationer/repairs

Kommentar/comments Crack stabilized with copper fish plates (modern) on both faces. New reinforcing iron at lower end screwed in place ✓

Association found with 12595, probably for storbåten ✓
