Joinery SINGLE piece blade, originally had a cap on the outside face of the head (ghost fayed surface visible). Scallops in outboard face near head, blade section tapered on back (inboard) side, flat outboard. Dado for iron reinforcing strip. shallow mortise on outboard face forms half of lifting handhold. ✓

Fastenings 1 hole in head for pivot bolt (probably iron), hole above reinforcing strap for lift line attachment (rust in hole suggests iron fitting. Reinforcing strap fastened with iron nails driven through blade. ✓

Coatings

Skador/damage Part of one long edge split off + missing, some shrinkage, light erosion ✓

Reparationer/repairs

Kommentar/comments Possible wear mark on outboard face, leading to lift line attachment hole ✓

Association Identical in form and dimensions to 00611 ✓
